* Description					
* Description	<p>Lexicology, as an important branch of semantics, deals with the rules in the nature, feature, classification, system, functions, structure and development of words, as well as semantic relations and analysis. This course is a fundamental elective for German majors in the junior year. It introduces basic theories in lexicology, classification and development of the German words, semantic relations and analysis, and the formation and features of the German words. This course is a combination of theories and applications. Students will get a better understanding and firm grasp of the German words through the course, thus finding a more efficient way to memorize words and enlarge vocabulary. 300-500</p>
