Description			
Description	<p>Systemic Functional Linguistics is a course which provides a balance between theory and practice, and it is helpful for students in linguistics to broaden their academic horizons on the one hand, and to cultivate the capability of analyzing spoken discourses and written texts on the other hand.</p> <p>Contents of the course include the history of systemic functional linguistics, M.A.K. Halliday (the founder of Systemic Functional Grammar) and the relation to China and the Chinese language, metafunctions, methods of discourse (text) analysis, ideational metaphor and interpersonal metaphor, and so on.</p> <p>Two purposes shall be attained. First, students are expected to grasp the basic methods of discourse (text) analysis. Second, students will be trained to build up a strong sense of theory after obtaining a systematic understanding of language (with systemic functional linguistics as example).</p>
