Course Information					
Course Code	BS441	* Credit Hours	192	* Credits	12
* Course Name	Graduation Project				
(Course Type)					
Audience (Language of Instruction)					
* School Prerequisite Instructor			(Course Webpage)		
* Description					
* Description	As an important course for German majors in senior years, Graduation Project is to help students apply their knowledge in researches by learning to handle academic or real world issues independently with basic research skills, so as to better prepare them for future researches and related work. The goal is for students to deal with graduation thesis in terms of designing, selection of topics, indexing and collection of information, as well as layout, argumentation, writing, editing and finalizing of the thesis. With all the creative work involved in this course, students will become more science-minded and build up the ability to apply their				

q

knowledge in a comprehensive way, i.e., to observe, identify, analyze and solve problems, and thus develop their independent research skills and ability to make innovations.
